

Simple two columns report

The goal of this lab is to become familiar with using the simple elements of JasperStudio. The expected result is provided.

Description of the report

The report displays the names of people registered in the ***address*** table in two columns.

The report also contains:

- a title
- a page header
- column headers
- a footer displaying the date and time of generation as well as a logo

The font used is ***Gentium***, it is an OpenSource font, supplied in the lab directory. It must first be installed. The font is made up of 2 files:

- GenR102.TTF
- GenI102.TTF for texts in italics

Add a link to an external URL on the footer logo

Use a conditional style in order to display in red people whose address is in Paris.

Use styles for the title and column headers

Secondly, externalize the styles defined in a ***.jrtx*** file

The expected result is provided as a template.
