

Parameters, Variables and Expressions

4.1 Parameter, variables

The report displays the list of orders sent sorted by City and Employee.

It takes a parameter which restrict data to a particular country.

Repeating values (a city name or an employee name) must not be displayed except at the beginning of the page.

At the bottom of the page, on each page are indicated:

- The date
- The first letter of the first city on this page as well as the last letter

(example A → E)

- The page number and the total of pages of the report

For each row where the send date was greater than the required date, a warning image is displayed.

4.2 Localization

Finally, the report must be able to be displayed in English or French.

The result of the desired PDF is provided as a template. Localization files in French and English are provided.
