First report with JasperStudio

2.1 Installation

Depending on your operating system, download the correct distribution of the JasperStudio community version.

Test the installation by creating an empty report and running it

2.2 First report with the wizard

The report we want to generate displays the list of addresses grouped by city. The solution in PDF format is provided.

We use a predefined template from Jasper.

Steps :

- Start the report creation wizard
- Choose the "Cherry" template
- Define the sample database as the data source
- Fill in the different steps of the wizard. Think carefully about the order in which the data is displayed

Once the report is created, preview in PDF
